

MATERIAL DATA SHEET

K63-linked Poly-Ub

Cat. # UB-P63

Product specification: 100µg

General Information

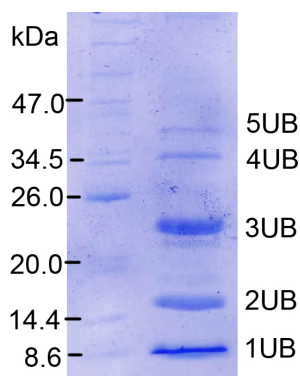

Poly-ubiquitylation of target proteins through linkage at K63, is now the most thoroughly studied of the various chain linkages, and was once considered the hallmark of this post-translational modification. K63-linked Poly-Ub was synthesized enzymatically *in vitro*. K63-linked Poly-Ub was produced using ubiquitin, UBE2N/UBE2V2 Complex(E2) and ubiquitin activating Enzyme (UBE1).

Formulation: Lyophilized powder

Quality Control

Purity: >95% as determined by SDS-PAGE

Storage: Store at -20 °C, avoid multiple freeze/thaw cycles

K63-linked Poly-Ub 15% SDS-PAGE
